

## **The Plastic Recycling Industry Gathers at RePlast Eurasia, March 26–28, 2026**

RePlast Eurasia, Türkiye's first and sole trade fair dedicated to the plastic recycling sector, is set to bring together industry professionals for its third edition. Taking place from March 26–28, 2026, at the TÜYAP Fair Convention and Congress Center in Istanbul, the event is organized by TÜYAP in collaboration with PAGÇEV Green Transformation and Technology Association. The fair will showcase the latest technologies, innovative solutions, and global business collaboration opportunities—all under one roof.

### **Global Participation and Visitor Targets**

Having achieved great success in 2025, the fair hosted 151 exhibitors from 13 countries across 10,000 m<sup>2</sup> of exhibition space and welcomed 8,340 visitors from 56 countries. Visitors from a wide range of regions, including Germany, the United Kingdom, the Netherlands, Iran, Italy, Poland, China, and Romania, highlighted the fair's strategic importance both regionally and globally. In 2026, RePlast Eurasia aims to continue contributing to the global trade volume of the sector with an even broader international participation.

### **Strategic Business Opportunities for Exhibitors**

RePlast Eurasia 2026 will not only provide participating companies with the opportunity to showcase their products, but also offer direct connections with national and international industry professionals seeking to explore recycling technologies and raw material solutions. During the fair, companies will be able to develop new business collaborations and make their sustainable projects and innovative solutions visible on a global scale. RePlast Eurasia will serve as a unique platform for exhibitors looking to establish strategic business connections and make an impact in international markets within the plastic recycling sector.

### **Innovative Solutions and Collaboration Opportunities for Visitors**

RePlast Eurasia 2026 offers visitors the chance to explore all areas of the plastic recycling sector under one roof. Attendees will have the opportunity to examine the latest products and technologies in the industry—including plastic recycling machines and technologies, collection and sorting companies, certification and testing equipment, design and consultancy services, raw material solutions, and yarn and fiber recycling machines. This allows visitors to discover innovative applications, make comparisons, and establish collaborations with leading companies.

### **Strategic Knowledge and Collaboration Platform: Plastic Recycling Conference**

The Plastic Recycling Conference, held as part of the fair, will continue to bring together national and international experts from the sector. At the conference, both exhibitors and visitors will be able to

stay updated on the latest developments in plastic recycling and create new business collaboration opportunities through meetings conducted during the fair.

### **Success Celebrated with PAGÇEV Plastic Recycling Awards**

RePlast Eurasia 2026 will continue to inspire the industry by highlighting innovative and successful projects through the PAGÇEV Plastic Recycling Awards. Presented in seven different categories, these awards will find their recipients at RePlast Eurasia. The recognized products and projects will provide insights into the use of recycled materials, product design, and innovations in manufacturing processes, while serving as a source of inspiration for professionals in the sector.

### **Save the Date**

From March 26–28, 2026, RePlast Eurasia will bring together industry leaders, innovative technologies, and inspiring projects. Don't miss this opportunity to establish new business collaborations, build strategic connections, and experience the opportunities that will shape the future of plastic recycling—mark your calendars now!
