

## **RePlast Eurasia 2025 Fair Prepares to Open Its Doors to Industry Professionals for the 2nd Time on May 8-10!**

RePlast Eurasia, the 2nd Plastic Recycling Technology and Raw Materials Fair, is preparing to gather under a single roof the actors of the world's plastics recycling industry on May 8-10, 2025. The fair will be organized by Tüyap Tüm Fuarçılık Yapım A.Ş. at Tüyap Fair and Congress Center in Istanbul, in collaboration with PAGÇEV Green Transition and Technology Association, and it aims at achieving new records and making a name as a brand in Türkiye.

As the first and only plastics industry fair organized in Türkiye, RePlast Eurasia will host thousands of industry professionals in both national and international arenas in 2025.

### **The First and Only Plastics Recycling Fair in Türkiye To Achieve New Records**

Showcasing state-of-the-art technology and innovative products in the plastics recycling industry, 124 exhibitor companies from 10 countries had the chance to exhibit their products and services to increase their brand recognition and achieve global recognition by establishing new commercial cooperations during the RePlast Eurasia 2024 Fair. 8,253 visitors from 85 countries met the key players of the industry during the fair that made an overwhelming impression in its initial year of organization. Industry representatives who will meet with a view to exhibit their products and services for the 2nd time in 2025 and strengthen their business network by establishing new business connections will have the opportunity to showcase state-of-the-art technologies and innovative solutions in the plastics recycling industry under the same roof. The objective of the RePlast Eurasia Fair 2025 is to break its own record in respect of the number of exhibitors, exhibition halls and visitors. Embracing the objective of bringing together over 150 exhibitor companies with more than 10,000 industry professionals, the fair will have one more hall where it will be given the opportunity to exhibit more diversified products and services.

### **Innovations Shaping the Future of the Industry on a Single Platform**

RePlast Eurasia 2025 Fair will continue presenting the latest technologies on recycling technologies and raw materials for a sustainable future. Products and services towards stages such as collection, sorting, washing and cleaning, grinding, melting and extrusion, reprocessing and production of plastic wastes will be exhibited as part of the fair. As the new choice of industry leaders, the RePlast Eurasia Fair will welcome recycling machine manufacturers, raw material producers, petrochemical companies, recyclable bag producers, companies manufacturing filters and even more exhibitors.

### **Much More Than Just a Fair**

While the fair hosted a highly successful award ceremony and a fruitful conference, it will not only present a wide range of products and services to its visitors, but also continue being a significant information sharing platform in 2025, as well. The first fair that was held in 2024 was awarded invaluable project awards in 7 categories of PAGÇEV Recycling Awards. Works have been rapidly launched for the contest that will be held in 2025.

Having among its finalists brand owners, product and packaging designers, raw material producers, machine and equipment manufacturers from the entire plastics value chain in Türkiye, the Recycling Awards will once again stand as a platform where a wide variety of projects will be evaluated also in 2025.

The conferences will have among its participants leading brands of the plastics recycling industry, renowned names and speakers who have made a name for themselves in their fields, which will make the fair serve as a hub for sharing information.

### **Do not Miss the Chance to Have a Free Ticket!**

Do not miss the chance of viewing hundreds of products that will be exhibited by the leading brands of the plastics recycling industry and use the free ticket opportunity that will last until March 25 to join this excitement and keep up with the developments in the industry!
